

## Art and Design intent

---

Art and design is a unique way to engage with and respond to the world. It enables children of all abilities to communicate what they see, think and feel. Our curriculum follows a **design**, **create** and **evaluate** structure. It sets design challenges then at looks the responses of other artists. It develops the necessary skills with a variety of materials and techniques. It values creativity and critical thinking in the pupils' solutions. At The Friars we use sketch books as our main tool for skill building, experimentation and evaluation.
