

# COMPUTING INTENT

---

- At The Friars Primary School we want our pupils to have a high quality Computing Curriculum, which enables pupils to play a role in the future which is exponentially changing.

It is our responsibility to ensure our pupils:

- Employ safe and sensible use of technology in a rapidly changing digital future.
- Develop a core understanding of the principles of information and computation, how digital systems work, and how to put this knowledge to use through programming skills.
- Equip our children to use information technology to create programs, systems and a range of content.
- Ensure that pupils become digitally literate (able to use, and express themselves and develop their ideas through, information and communication technology) – at a level suitable for the future workplace and as active participants in a digital world.
